

Tips for Hosting a Kid Driven Drive

- Pick a Kid Driven Drive project to complete with your group
- Decide on a location for all items to be dropped off or collected (we suggest putting out a covered bin where items can be dropped off)
- Create a checklist that includes what items are needed, how many of each item is needed, and a spot to include the name of the people donating the item(s)
- Create a “script” and practice how you will talk about your Kid Driven Drive with local neighbors, family, and friends
- Create a Donation Reminder slip to hand out to those who signed up to donate, so they remember to bring their item to the designated location
